SYSTEM PREPARATION INFORMATION FOR LOADABLE FILES ONTO THE SCB-RP AND GESB BOARDS

1 GENERAL

This document describes which files from the SW package, LZN 901 0206, that are necessary for each of the boards SCB-RP and GESB to make them function according to 1551-CRA 119 738.

Files below with extension .chk are files that can be extracted from the SW package and then loaded into the boards from a file server (TFTP) that belongs to the system, for instance the TSP system, by using for instance IPLOADR, see 1551-CXP 901 738. In other words, the SW package files should reside on a file server. The files can then be loaded by boards using IPLOADR.

This SW package is packed under Solaris with tar and zipped with gzip.

2 SW FILES REQUIRED FOR SCB-RP

19003-CXC_146_13.chk (RIEXR)
2/19003-CXC_132_3465.chk (INET_RPI)
2/19003-CXC_132_2955.chk (IPLOADR)
19003-CXC_132_4436.chk (RPMBHR)
19003-CXC_132_4435.chk (RPMMR)
19003-CXC_132_3145.chk (SCB_OMFR)
19003-CXC_132_3516.chk (SCBSWMGR)
19003-CXC_132_4434.chk (SCB_SNMPR)

3 SW FILES REQUIRED FOR GESB

19003-CXC_146_13.chk (RIEXR)
2/19003-CXC_132_3465.chk (INET_RPI)
2/19003-CXC_132_2955.chk (IPLOADR)
19003-CXC_132_4392.chk (GESBSWMGR)
19003-CXC_132_3322.chk (GESB_SNMPR)
